

IN THE SPECIFICATION

Page 5, amend the paragraph beginning on line 16 as follows:

Body 2 also comprises a grip portion 4 gripped in use by the user and located adjacent to and longitudinally consecutive to connecting portion 3 along axis A. In the non-limiting embodiment shown, grip portion 4 has a lateral contraction substantially at its central portion. More specifically, the longitudinal curvature and the lateral contraction of body 2 are such as to provide for easy grip of grip handle 1 by the user.
